

Jaguar/Land Rover Dealership

BUCKL
ARCHITECTS

“The site was configured to allow exterior display plinths, customer parking in the front, and a small Land Rover off-road demonstration track.”

This single story dealership was a design/build project through North Star Construction. The design followed a franchise prototype design with modifications by the owner within allowed limits. The site was configured to allow exterior display plinths, customer parking in the front, and a small Land Rover off-road demonstration track. The show room was enlarged, a main entry air lock added, and the Vehicle Service Reception area move indoors. The new car delivery room was oriented to keep vehicle traffic away from pedestrian flow.

Finish features include:

- Cultured Stone Veneer
- Alucabond Panels
- 4 Sided Structurally Glazed Curtain Wall
- Stone Finish Coat on Plaster
- Cherry Wood Deck and Trim

Project Team

Buckl Architects
North Star Construction
Barry Isset & Associates

Project Area

24,000 sf

Completion Date

Summer 2006
