

Cafeteria Renovation

“...the warmth of whimsical incandescent pendant and wall sconce lighting to create a relaxing atmosphere and an array of seating options to customize your dining experience.”

Welcome to Mountainside Hospital's newly renovated cafeteria where the food is fresh, the coffee is hot, and you receive service with a smile! Upon your arrival, visit the new servery with colorful graphics highlighting a variety of food options and leads you through the space. Also, with our reorganized buffet style servery, we are able to present a wider selection of foods from daily specials to the usual favorites. We've added the warmth of whimsical incandescent pendant and wall sconce lighting to create a relaxing atmosphere and an array of seating options to customize your dining experience. For those people "on the go", a wavy bar top spans between three columns. Elsewhere, a variety of table sizes were used to accommodate groups both large and small with continuous banquettes at the perimeter. Off of the main dining area, the physician's lounge was also renovated with carpeting, arched soffits and new lighting to create a more formal environment.
