Reuf Natatorium Feasibility

BUCKL
ARCHITECTS

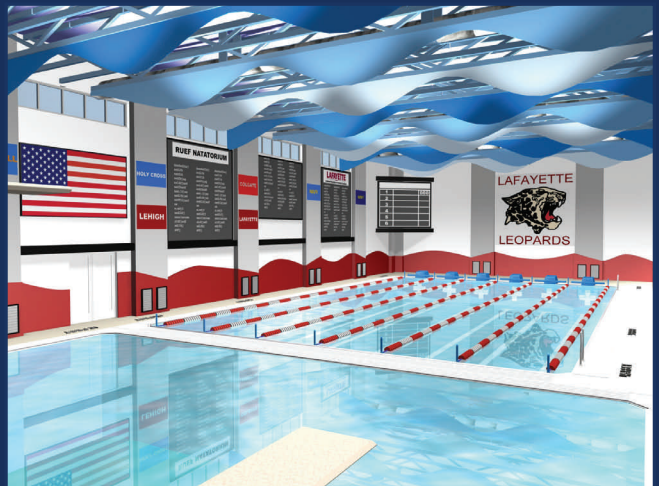

“...Buckl Architects produced a renovation plan and budget analysis of the costs associated with the various options of recommended work.”

Shortly following the opening of the Kirby Sports Center facility, Lafayette College identified a need for improving the Reuf Natatorium.

The proposal addressed specific aesthetic needs, code compliance issues, and recommended building systems upgrades - including water filtration upgrades.

To accommodate the aquatics department, an off-season construction schedule was established to prevent academic-year disruptions.

At the College’s request, Buckl Architects produced a renovation plan and budget analysis of the costs associated with the various options of recommended work. The Renovation investigation included schematic design elements to be used by college to generate alumni interest.

Project Team

Buckl Architects
Snyder Hoffman &
Assoc.

Project Area

10,200 sf

Completion Date

2000
